

DO YOU KNOW A HORSE'S AGE???????????

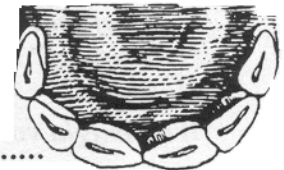

2 weeks.....

Two middle nippers before 2 weeks of age

6 weeks.....

2 more will come before 6 weeks

8 month.....

at twelve month corners will cut the gums

3 years.....

at two the middle nippers drop 2nd pair appears

4 years.....

side pair show

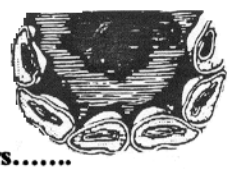

5 years.....

a full new mouth he grows

6 years.....

7 years.....

two side pairs at seven

8 years.....

eight will find clear corners

9 years.....

middle nipper upper jaw black spots will withdraw

10 years.....

sides are light

11 years....

find the corners white

15 years....

as time goes on we know the oval teeth three sided grow

21 years..

Teeth get longer as before

30 years....

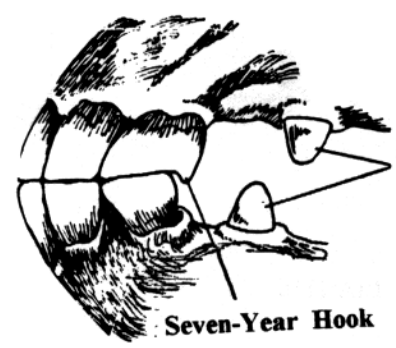

after twenty we know no more!
